Computer Science Major with hands-on experience in web development using HTML, CSS, JavaScript, and React. Comfortable working with Git, GitHub, and Linux-based workflows, and actively building projects to strengthen real-world development skills. Seeking an internship to learn, contribute, and grow as a developer.

EDUCATION

Graphic Era Hill University	2023 - 2026
Bachelor of Computer Applications CGPA – 7.82	
Rishiram Shikshan Sansthan	2020 - 2022
Intermediate PCM Percentage – 69.73%	

TECHNICAL SKILLS

Languages : C, Java

Developer Tools : NeoVim, Bash, Git, GitHub, Linux, VS Code

Technologies / Frameworks : HTML, CSS, Netlify

Libraries : React\

PROJECTS

YomiBashi - Japanese Subtitle Converter

- Developed a mobile-first React application that converts Japanese .srt subtitle files into beginner-friendly Romaji subtitles for language learners.
- Integrated the frontend with a FastAPI backend using asynchronous file upload/download workflows and deployed the application using Netlify and Render.

LyriQ - Custom Lyrics Card Generator

- A React-based web application inspired by the lyric card creation feature from Genius.com, allowing users to generate and export custom lyric cards for social sharing
- Implemented responsive lyric card generation and export features using `html-to-image`, FileReader API, and dynamic image processing for multiple social media formats.

DHH Tv (Custom Web App for Instagram Media Page)

- Developed a React-based post generator inspired by RapTV for creating stylized hip-hop and entertainment media posts for some custom Instagram Media Page.
- Implemented customizable layouts, dynamic text/image handling, and export functionality for Instagram-style content generation.
- Expanded the project based on user feedback and planned AI-powered content generation and automated publishing features for media-focused workflows

Weather App Using React

- Built a responsive weather web app in **React** that fetches real-time weather data from a public **weather API**
- Implemented dynamic UI updates using **React state** and **hooks** for user-entered locations
- Improved understanding of **API integration**, **asynchronous requests**, and component-based architecture

Personal Portfolio Website

- A personal portfolio website to showcase projects, skills, and achievements with a clean, responsive layout and semantic HTML structure
- Deployed and maintained the site using **GitHub Pages**, practicing **version control** and **clean commits**

Functional Apple.com Clone

- Developed a modern Apple.com clone using **React + Vite** with reusable components, responsive layouts, and scalable project structure, demonstrating strong understanding of UI composition, state management, and frontend best practices.

CERTIFICATIONS AND ACHIEVEMENTS

- The Complete Web Development BootCamp | Udemy
- Vim-Fundamentals | Front End Masters
